Re: Property located on Route 735, Hanover County

Dear Mr. and Mrs. Stallings:

Since we last discussed the situation regarding the condition of the subject property and those unknown materials found on the property, a thorough investigation has been performed through a joint effort of Virginia State Police and various Hanover County agencies in addition to a laboratory analysis of the contents of the barrels found onsite.

At this time, there is insufficient evidence to connect ownership or improper disposal of materials with any known parties. Due to the results of the laboratory analyses of the products on your property, it is my suggestion that an environmental contractor be contacted for removal and disposal. I am not allowed to recommend a particular firm, however, I am attaching a list of area contractors, which include several in the metropolitan Richmond area from which to choose for your reference.

It is my intention to work with you and the contractor until complete cleanup is effected. I suggest that an informal conference be held after selection of a contractor is made in order to establish exactly what must be done.

I look forward to hearing from you. Please call me if you require any further information.

Very truly yours,

*John F. Trivellin*
